In the Order management tab you will find the "Order Session". An Order Session gives access to the creation of multiple orders for a single or several portfolios in one session.

Accessing the Order Session function

- Select the Portfolio Analysis tab.
- **2** From the menu bar, go to **Order Management Order Session Create Session**. Select this option to create a new session (order entry).

Creating Security orders – Create Session

- Select the Portfolio Analysis tab.
- Prom the menu bar, go to Order Management Order Session Create Session.
- 3 Name the Session in the Description free test field.
- Press Security Order button.

Order management - order session - create session

5 Select the desired order BUY or SELL.

- 7 Select whether you would like to initiate the order in **Quantity** or in **Amount** in the dropdown list.
- 8 Select the Cash Account you would like to use for the transaction from the dropdown list.
- Press Save.

Press New to create additional transactions on the same security for other portfolios and repeat steps 5 to 9.

1 Once you created last required order press **Back to Session**.

Order management – Order Session – Block order and underlying children orders

000000

⁽¹³⁾ Click on **Check Session** button and adjust as per Sanity Check recommendations and warnings and click on **Check Session** again.

Once there are no more blocking warnings press **Release Session for Trading** button.

Session is now created and released for trading.
